*Available for Plus Version only

Office Server Document Converter (formerly known as Server Based Converter) continues to be the fastest and most reliable conversion engine for transforming large volumes of MS Office files to PDF. OSDC has converted over thousands of Word, Excel, PowerPoint, and PDF documents to other text or picture formats our clients can use. Best of all, there's **no need to install Microsoft Office or Adobe software!**

Available for Windows & Linux

High Volume Document Conversion

Office Server Document Converter (OSDC) is a conversion library used for transforming large volumes of MS Office (Word/Excel/PowerPoint) documents into PDF, SVG, or image files on a server without reliance on Microsoft or Adobe software. OSDC stands out due to performance on heavy loads, compatibility with Windows & Linux, and a friendly customer support team.

The latest release of OSDC V6.1 comes with a new name and continued support for:

- Microsoft Office 2016
- MS Word conversion engine has been completely rewritten to ensure high-fidelity while maintaining the integrity of the original document when converting to PDF
- bidirectional text - BIDI support is a major feature for documents that need to display right-to-left scripts such as Arabic or Hebrew
- internalization & localization in terms of displaying dates in locale format
- text layout rules for different languages
- PDF annotations when converting from PDFs
- conversion of images on Linux OS

Performance

OSDC is in production with several large corporations converting an average of over 10 pages/second.[†] Our software is thread safe, allowing concurrent access and lets you take control with multiple API options: Java, .NET, COM, C/C++, and Command-line. Plus, all conversions are performed without the need for Microsoft Office or Adobe software installation.

System Support

Windows	Linux
Windows Server 2016 Windows Server 2012 R2 Windows Server 2012 Windows Server 2008 R2 Windows Server 2008 (32bit/x64) Windows 10 (32bit/x64) Windows 8.1 (32bit/x64)	Red Hat Enterprise Linux series CentOS series Fedora series libc.so.6 (glibc-2.17), libstdc++.so.6 (libstdc++.so.6.0.19) or the binary-compatible libraries are required.

Risk Free Trial

We offer an unlimited evaluation to test OSDC for 30 days to ensure our product meets your expectations, needs, and requirements. Visit www.rainbowpdf.com to download a free trial evaluation!
